

# SureUp

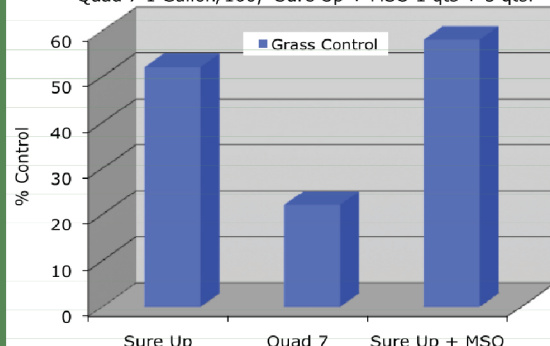

Just for Sulfonyleurea & Sulfonamide Herbicides

Sure Up is a premium surfactant blend specifically designed for sulfonyleurea and sulfonamide herbicides. Sure Up is special because it is also a water conditioner that Maximize the solubility and performance of sulfonyleurea (SU's) type herbicides.

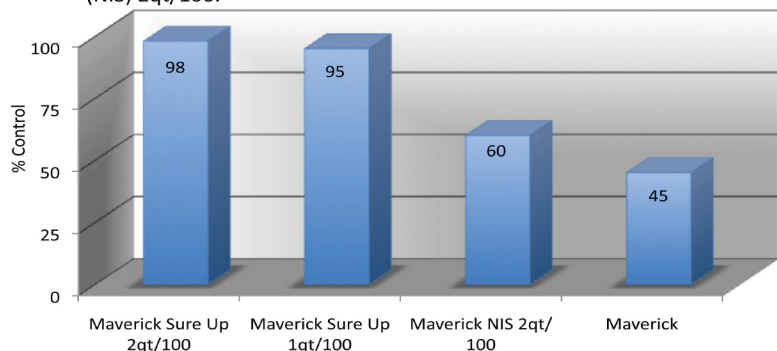

ACCENT Performance with Sure Up as Compared to Quad 7. Greenhouse Screen Colorado State University. Sure Up 2qts/100, Quad 7 1 Gallon/100, Sure Up + MSO 1 qts + 3 qts.

All SU herbicides have this type of physical chemical profile. Sure Up will improve the performance of all SU herbicides like Accent.

Sure Up was originally designed to improve the performance of aerial applied Maverick Herbicide.

The Performance of Sure Up Surfactant with Maverick Herbicide for Downy Brome Control, Fall Application. Maverick Applied 0.5 oz/A. Sure Up Applied at 2 qt/100 and 1 qt./100. Non Ionic Surfactant (NIS) 2qt/100.

This was done by:  
Increased Water Solubility, Clear Spray Solution,  
Increase Sulfonyleurea Uptake, Increased Performance

Sure Up Compared R-11 (NIS) Ability to put Maverick Herbicide into solution. Spray volume 3 gallon/Acre.
